CAREER OBJECTIVE

Full Stack Developer with hands-on experience in Java-based backend development, relational database design, and cross-platform mobile application development. Proficient in building RESTful APIs, implementing role-based authentication, and designing normalized SQL databases. Seeking a Software Engineer role at an MNC to contribute strong Java, MySQL, and full-stack skills in building scalable enterprise applications from day one.

EDUCATION

Sagar Group of Institutions — SISTec GN

Bachelor of Technology, Computer Science & Engineering

– CGPA: **8.31/10**

Bhopal, Madhya Pradesh

Aug 2022 – May 2026

TECHNICAL SKILLS

Languages: Java, Kotlin, TypeScript, SQL, Python

Mobile Development: Android (Kotlin, XML), React Native, Firebase

Frontend: Angular (learning), React Native, XML, TypeScript, Custom Hooks

Backend & Databases: RESTful APIs, JDBC, MySQL, MongoDB Atlas, Firebase Realtime Database

DevOps & Tools: Git, Docker, Jenkins (CI/CD), Kubernetes (learning), Android Studio

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, MVVM Architecture, Normalized Database Design, Role-Based Access Control (RBAC)

PROJECTS

Employee Attendance & Resource Management System | *Java, MySQL, JDBC*

Jan 2026 – Apr 2026

– Developed a desktop application managing employee records, attendance tracking, and automated leave processing for **50+** users.

– Designed a fully normalized relational database with **8 tables**, eliminating data redundancy and enforcing referential integrity through foreign key constraints.

– Implemented Role-Based Access Control (RBAC) with Admin, Manager, and Employee tiers, featuring secure authentication and authorization workflows.

– Automated leave approval workflows with email notifications, significantly reducing manual processing time and administrative overhead.

– github.com/manishapoundrik/Employee-Attendance-System

Teach Tracker — Faculty Schedule Management | *Kotlin, XML, Firebase, MVVM*

Mar 2025 – May 2025

– Built an Android application for managing faculty teaching schedules with real-time data synchronization via Firebase Realtime Database.

– Developed a custom conflict-detection algorithm to prevent double-booking of faculty members across multiple simultaneous courses.

– Implemented MVVM architecture with LiveData for reactive UI updates, ensuring clean separation of concerns and maintainability.

– github.com/manishapoundrik/Teach-Tracker

EXPERIENCE

Freelance Android Developer

Jan 2026 – Apr 2026

Self-Employed

Remote

– Delivered the end-to-end Mechanic Finder application independently — from requirements gathering with stakeholders through design, development, and deployment.

– Applied scalable engineering practices including Docker containerization and CI/CD pipeline exploration to ensure production-readiness.

CERTIFICATIONS & TRAINING

Python for Data Science | *NPTEL Certification*

Android App Development using Kotlin | *Udemy*

Cisco CCNA: Introduction to Networks, Switching, Routing & Wireless Essentials | *Cisco*
