

MANISHA POUNDRIK

Full Stack Developer | MERN Developer

+91-7389869831 | poundrikmanisha@gmail.com | Bhopal, Madhya Pradesh, India
linkedin.com/in/manisha-poundrik | github.com/manishapoundrik

CAREER OBJECTIVE

Full Stack Developer focused on building production-ready web applications with the MERN stack, REST APIs, authentication, databases, containerization, and cloud deployment. Experienced in developing end-to-end applications and implementing CI/CD workflows for scalable deployments.

EDUCATION

Sagar Group of Institutions – SISTec GN

Bachelor of Technology, Computer Science & Engineering | CGPA: 8.32/10

Bhopal, Madhya Pradesh

Aug 2022 – Jun 2026

TECHNICAL SKILLS

Languages : Python, SQL, Java, C++

Frontend : HTML, CSS, JavaScript, React, Vite

Backend: Node.js, Express.js, REST APIs, Microservices, API Gateway

Database : MySQL, Firebase, MongoDB, Redis

Cloud & DevOps : AWS ECS, ECR, S3, CloudFront, IAM, Secrets Manager, Docker, Github Actions

Tools & Payments : Git/GitHub, Razorpay, Firebase Authentication

PROJECTS

AI-Enabled Garage Finder | React Native, Node.js, Express, MongoDB Atlas, Expo, Github, Docker

- Developed an end-to-end mechanic-finding application using the MERN stack, handling frontend, backend, database integration, and deployment.
- Integrated location-based and third-party APIs with data-driven matching logic to help users find relevant mechanics.
- Built REST APIs and implemented the application's core backend functionality using Node.js and Express.js.
- Containerized the application with Docker and configured GitHub Actions CI/CD for automated builds and deployment.
- Applied Git branching and pull-request practices to maintain clean, production-ready code.
- *Application URL:* github.com/manishapoundrik/AI-Enabled-Garage-finder/

NexoraAI – Multi-Agent AI Platform | React, Node.js, Express, MongoDB, Redis, Firebase, AWS, Docker

- Engineered a microservice-based multi-agent AI platform with an Express API Gateway and independent Auth, Chat, Agent, and Billing services.
- Containerized and deployed backend services on AWS ECS with Amazon ECR, using AWS Secrets Manager and IAM for secure runtime credential management.
- Built GitHub Actions CI/CD to build and deploy backend services to ECS and the Vite frontend to S3 + CloudFront.
- Implemented Firebase/Google authentication, protected API routes, Redis integration, and Razorpay billing functionality.
- *Application URL:* <https://d3sop2e5c7665n.cloudfront.net/>
